

Dear Caring Family Member,

During my many years of experience in the home care industry, both my parents came to need in home care in their later years. I will work hard to bring the same dedication to your loved ones as I devoted to my own parents care needs!

Human Touch Home Care is a *registry of carefully screened caregivers, who have met our requirements*, including a face to face interview, initial and periodically updated reference checks, competency testing, infectious disease (TB) screening and PA criminal background checks. Careful consideration will be given to making the best possible match between client and caregiver. Based on careful listening to your needs our customized service will adapt to your changing **non-medical** care requirements.

OUR PHILOSOPHY

Human Touch Home Care believes that caring human relationships optimize the quality of life for older Americans as they become frail and infirm. We are dedicated to building and nurturing those relationships. Our mission is to refer only the most caring and capable individuals as we work with you to empower our clients in their pursuit of safe, happy lives in their own homes.
